- Frontend Development
- Full-Stack Development
- Responsive Web Design
- Mobile App Development
- REST API Integration

TOOLS & DESIGN

- Figma
- Canva
- Microsoft Word
- Microsoft Excel
- PowerPoint

EDUCATION

B.E. Computer Science and Engineering (Cyber Security)

NPSBCET

Pursuing Degree

PROFESSIONAL SUMMARY

Motivated and enthusiastic B.E. Computer Science and Engineering (Cyber Security) student with a strong interest in Web Development, Full-Stack Development, Mobile Application Development, and Cyber Security. Passionate about building modern, user-friendly, and secure applications using various programming languages and development frameworks.

Possess hands-on experience in frontend and backend development, database management, UI/UX design, and AI-powered applications. Skilled in developing web applications, mobile apps, chatbot systems, voice assistants, and e-commerce platforms. Continuously learning emerging technologies and seeking opportunities to apply technical skills to real-world projects.

PROJECTS

AI Chatbot with Gemini API

Developed an intelligent, context-aware AI chatbot using the Gemini API. Capable of generating meaningful responses, handling custom prompts, and assisting users efficiently with dynamic task automation.

Nezuko Voice Assistant (Anime Style)

Built a customized voice-controlled virtual assistant inspired by the Nezuko anime character. Integrated robust speech recognition algorithms, fluid voice interaction models, and intuitive task automation features.

Smart Parking Application

Designed and developed a comprehensive parking management application targeted at optimizing urban mobility. The platform helps users seamlessly locate, monitor, and reserve parking spaces in real-time.

E-Commerce Website

Created a full-featured e-commerce platform equipped with robust product management, secure user authentication systems, interactive shopping cart functions, and efficient order processing pipelines.

Yuji OS UI Customization

Customized and redesigned a distribution of Parrot OS under the moniker "Yuji OS". Focused extensively on deep user interface enhancements, custom desktop styling, and building an optimized user experience layout.

CAREER OBJECTIVE

To obtain a challenging position in a reputable organization where I can utilize my skills in Cyber Security, Full-Stack Development, Web Development, and Mobile Application Development while continuously learning and contributing to innovative technology solutions.
